SKILLS

Front-End: JavaScript (React), HTML, CSS, Bootstrap, Material UI

Back-End: Node.js (CRUD), Express JS, MongoDB, Postman

Tools: Github, FireBase, Netlify, Heroku

Other: Visual Studio Code, Git, npm, WordPress theme customaization, Elementor, PSD to HTML,

PROJECTS

1. Misti Village (in English it is called "Sweet Village")

This is an e-commerce site where customer have to login for ordering sweets online and admin can upload new products and delete old products from database. If an admin uploaded a new product it will be saved in the database and show in home page.

Technologies Used: JavaScript (React), HTML, CSS, Node, Visual Studio Code, Bootstrap, React router, Firebase, Mongo DB, Heroku

2. Sports Valley

In this site you can know details about different sports league which I made using API. In home page you will see many different league and their name, type and logo, if you click on explore button you will get to know the details of that league. Dynamic route is used in this site.

Technologies Used: JavaScript (React), HTML, CSS, Visual Studio Code, Bootstrap, Dynamic Route, Netlify

3. Bangladesh Premier League

This site is made using fake data. You can select players from the available option and you can also know the total expense that is needed to buy those selected player. This project is very special to me as I made this site using fake data of Bangladesh National Cricket Team players.

Technologies Used: JavaScript (React), HTML, CSS, Visual Studio Code, Bootstrap, Dynamic Route, Netlify
